

## Customer Reference List - June 2007

With our outstanding staffITpro application we help our customers fulfill their need to place the best IT professionals in their clients' projects fast and easy. Our highest priorities are customer confidence and trust. Read for yourself what our customers.

audeoSoft was established in 1999 with a focus on consulting, developing object oriented projects in Java, as well as building Internet / Intranet solutions. Based upon years of experience with internal IT projects, we developed a tool that became our product staffITpro. In addition, [www.myCVservice.com](http://www.myCVservice.com), became a competitive alternative to existing job marketplace resume portals. myCVservice is now a meeting point for companies and applicants with the focus on IT, SAP and technical jobs. We integrated our BackOffice solution staffITpro into our resume portal myCVservice. audeoSoft was also a pioneer in the development of computer readable XML resumes for the staffing industry,

which simplified applicant processing for many companies. Our Web Portal [www.myCVservice.com](http://www.myCVservice.com) was one of the first Internet marketplaces to use this future-oriented XML Internet format thereby making resumes easily accessible for companies and job applicants at the same time. Today, more and more companies and applicants are using our machine-readable XML resumes, and both sides are profiting by using this timesaving method of data exchange. audeoSoft views itself as a European enterprise, but also offers products in the world-wide arena! audeoSoft stands for quality, innovation, and future oriented solutions in personnel recruiting.

## Via Consultants

Established in 1999 by a group of experienced SAP professionals, Via Consultants specializes in providing companies with SAP consulting services. From coast to coast, we service system integration firms and SAP customers through our offices located in Montreal, Toronto and Calgary. Within Via Consultants, we offer an array of experienced and highly skilled functional as well as technical consultants. Our experts span all SAP R/3 modules as well as "New Dimension Products" (Net-Weaver, Enterprise Portals, XI, BI, SCM, SEM, ERP, CRM, etc.). Our consultants possess strong industry background with hands-on operational SAP implementation experience.

This expertise is the basis for our reputation as a leading supplier of SAP expertise to SAP integrators and SAP clients. We have a thorough knowledge of the business imperatives associated with SAP R/3 projects, a thorough understanding of the different roles, the phases of the lifecycle and the amount of effort required to deliver a successful solution to our clients. We use this knowledge and experience to propose only those resources that have the required business, industry and SAP experience to successfully deliver maximum value to our clients.
