

Customer Reference List - June 2007

With our outstanding **staffITpro** application we help our customers fulfill their need to place the best IT professionals in their clients' projects fast and easy. Our highest priorities are customer confidence and trust. Read for yourself what our customers.

audeoSoft was established in 1999 with a focus on consulting, developing object oriented projects in Java, as well as building Internet / Intranet solutions. Based upon years of experience with internal IT projects, we developed a tool that became our product staffITpro. In addition, www.myCVservice.com, became a competitive alternative to existing job marketplace resume portals. myCVservice is now a meeting point for companies and applicants with the focus on IT, SAP and technical jobs. We integrated our BackOffice solution staffITpro into our resume portal myCVservice.

audeoSoft was also a pioneer in the development of computer readable XML resumes for the staffing industry,

which simplified applicant processing for many companies. Our Web Portal www.myCVservice.com was one of the first Internet marketplaces to use this future-oriented XML Internet format thereby making resumes easily accessible for companies and job applicants at the same time. Today, more and more companies and applicants are using our machine-readable XML resumes, and both sides are profiting by using this timesaving method of data exchange. audeoSoft views itself as a European enterprise, but also offers products in the world-wide arena! audeoSoft stands for quality, innovation, and future oriented solutions in personnel recruiting.

Customer references
