

smartCV

We make staffing faster

smartCV is the intelligent online-solution for the recruiting and staffing business. smartCV seamlessly integrates with your company's web site and makes your daily tasks more effective and reliable.

Finding the right candidate for an open position is your goal. smartCV makes your job much easier and immensely increases the web site's value to applicants. With smartCV you offer an easy-to-use window for applicants to enter and submit a complete resume.

How does it work?

An applicant can enter his user name and password and create an account on your web page. He will log in and enter all relevant skills, work experience, and contact information and instantly submit his resume to you. The applicant can always go back and update information if necessary. All information will stay on your server.

smartCV - secure and fast

smartCV and staffITpro are two independent systems that work together seamlessly. smartCV saves the resumes in xml format. This format can be automatically imported into staffITpro.

smartCV will be completely integrated into your website and will be part of your corporate identity.

staffITpro
...just staff it
